## Practical No. 7 Working with Charts in Power apps

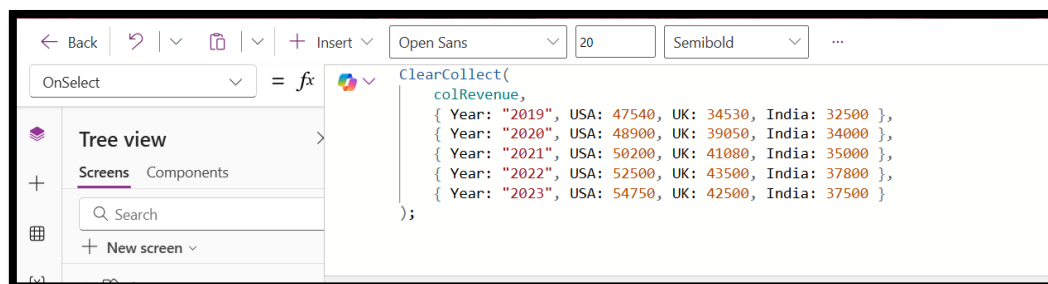

Insert a Column Chart in your Power app

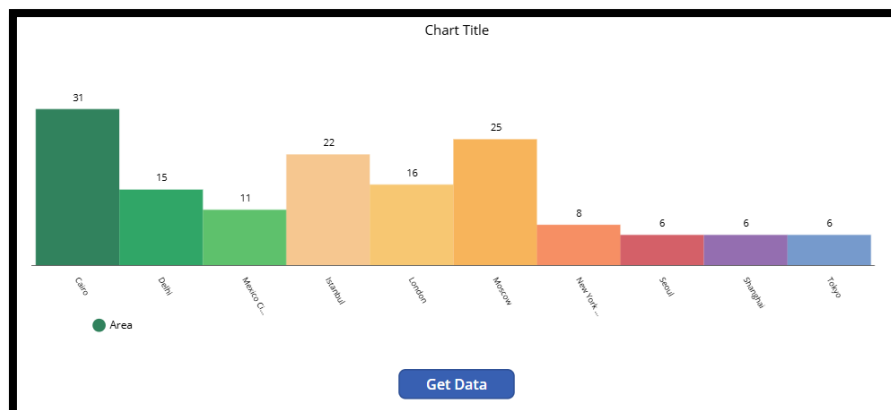

Then insert a button and name it GetData

In OnSelect function of GetData, add this formula

```
ClearCollect(
colRevenue,
{ Year: "2019", USA: 47540, UK: 34530, India: 32500 },
{ Year: "2020", USA: 48900, UK: 39050, India: 34000 },
{ Year: "2021", USA: 50200, UK: 41080, India: 35000 },
{ Year: "2022", USA: 52500, UK: 43500, India: 37800 },
{ Year: "2023", USA: 54750, UK: 42500, India: 37500 }
);
```

Your screen will look like this

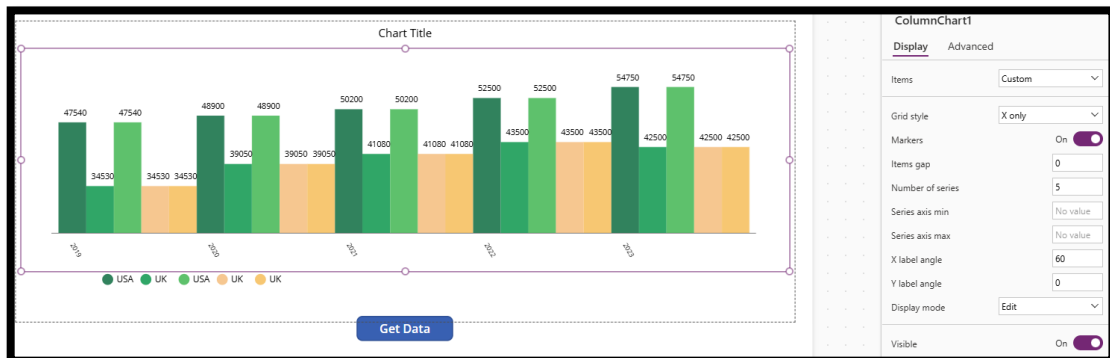

# Kishinchand Chellaram College, Mumbai - 20.

FY / SY / TY B. Sc. (I. T.) Semester\_\_\_\_\_

You can change the series from the advanced properties to any country you would like to see  
For eg. USA or UK

You can change the no. of series you want to display, eg 5 that I have used.

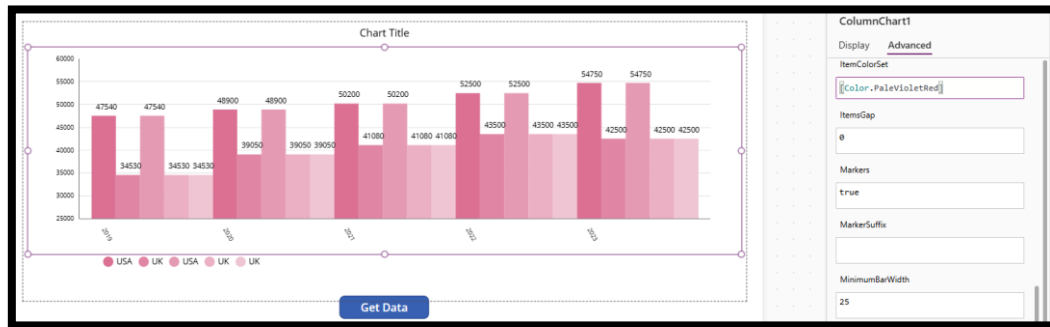

You can change the grid style

# Kishinchand Chellaram College, Mumbai - 20.

FY / SY / TY B. Sc. (I. T.) Semester\_\_\_\_\_

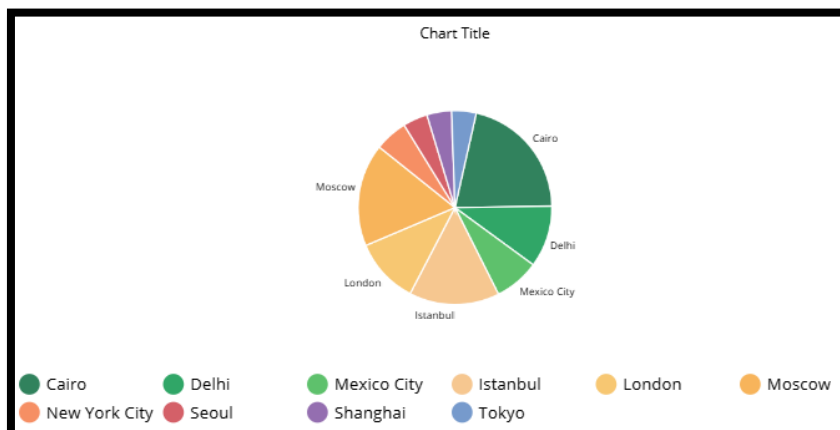

You can change the color of the items by ItemColorSet property

Now insert Line Chart and add the colRevenue in the items property

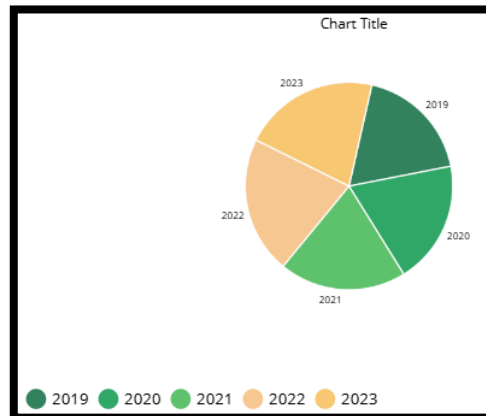

Now insert a Pie Chart

# Kishinchand Chellaram College, Mumbai - 20.

FY / SY / TY B. Sc. (I. T.) Semester\_\_\_\_\_

In items property, add the colRevenue data

AddColumns( AddColumns( colRevenue, 'Total Revenue', India + UK + USA), 'Label', Concatenate(Year, "(", 'Total Revenue', ")") )
